We work closely with private clients, architects, interior designers and structural engineers in order to build trusted long-term relationships.

From the meticulous completion of detailed project tenders, through to the successful handing over of the finished project, Über Contracts will manage the build process from start to finish.

As a matter of principle we do not subcontract our works packages – maintaining complete and direct control of our builds.

From our initial surveys and consultations with our clients, architects and designers, we put the emphasis on continuous interaction, keeping all parties informed and up to date at all times.
